

This table is intended to assist IIS and others that must interpret codes relating to H1N1-09 vaccines. It shows the mapping between CVX, NDC and CPT code. It also suggests a pseudo-trade name. Many IIS use trade name to select the vaccine given. At present, there are no official trade names. These suggestions may be used for that purpose. Any tradename that captures H1N1, manufacturer, preservative free status and vaccine should work.

AMA has published a new CPT code(90470) to be paired with 90663 that indicates H1N1 vaccine has been administered. It does not indicate a second immunization. Partner systems should be encouraged to send the 90663 only. If partner systems send 90470, it should be mapped to CVX 128.

manufacturer	vaccine	pseudo-trade name	NDC	Description	CVX	CPT
sanofi	H1N1 influenza-preservative free	H1N1Pfreesan	49281-0650-25	0.25 ml prefilled syringe(10 10packs)	126	90663
sanofi	H1N1 influenza-preservative free	H1N1Pfreesan	49281-0650-50	0.5 prefilled syringe (10 10packs)	126	90663
sanofi	H1N1 influenza	H1N1san	49281-0640-15	multidose vial, 5mL 10 1packs	127	90663
sanofi	H1N1 influenza-preservative free	H1N1Pfreesan	49281-0650-70	0.25 ml prefilled syringe(4 25 packs)	126	90663
sanofi	H1N1 influenza-preservative free	H1N1Pfreesan	49281-0650-90	0.5 prefilled syringe (4 25 packs)	126	90663
